About 11

01 How to Log Into Wordpress

Your website content is powered by a WordPress administrator dashboard. Follow these steps to access it securely:

1. Open your web browser and navigate to your administrative login URL:
   https://businessdedk.lucasalmeida.dk/wp-admin

2. Enter your unique Username or Email Address and your secure Password.
   Username: admin
   Password: businesspassword

3. Click Log In.

Once authorized, you will land on your primary dark-gray WordPress Dashboard menu layout visible on the left side of your screen.

02 Main Page and Footer

To update the high-profile elements of your website, such as the main image at the very top of the homepage or the overall contact information at the bottom of every page, navigate to the Pages option in the left-hand sidebar menu. From here, click All Pages to locate your core configuration pages.

Changing the Homepage Hero Image

The "Hero" is the large banner area that visitors see first when they land on your website.

1. Inside the Pages directory, click on Home Page to open its layout manager.
2. Scroll down through the page settings until you find the designated Hero Section fields.
3. Locate the image selector component. Click to upload a new, high-quality panoramic banner from your computer, or pick an existing image from your WordPress Media Library.
4. Scroll back to the top right and click the blue Update button to push your new visual design live.

Updating the Website Footer & Hours

Global elements like the website's footer text, operating schedules, social links, and physical address are managed from a single, centralized location so you don't have to change them on every individual page.

1. Head back to the Pages directory in your left-hand menu.
2. Locate and click on the page titled Global Settings.
3. Inside this screen, you will find dedicated input fields for your operational metadata:
    - Contact Information: Update the primary organizational emails, reception phone lines, or physical office locations.
    - Schedules / Opening Hours: Modify the text blocks indicating your weekly operating or support hours.
4. Once you have made your updates, click the blue Update button in the top-right configuration box to sync these changes across the footer of every page automatically.

03 Media

To manage your video library, navigate to the Media option in the left-hand sidebar menu. At the top of the screen, you can edit existing media files or upload a new one by clicking the Add New Media button.

Important Guidelines for Creating or Updating Media:

- Primary Language (English): The primary Title and Main Content Text Editor fields at the top of the page must be written in English.
- Multilingual Titles: Directly beneath the main text editor, locate the Title DK field to enter the translated title for Danish site visitors.
- Video Description & Thumbnail: Scroll to the Media Video section:
    - Video Description: Write a short overview summary. This text appears on the overview cards inside the public "Media" page before a user clicks through.
    - Thumbnail Image: Assign the preview graphic image that accompanies the video item in directory listings.
- Video Link Embed: Paste the raw YouTube or streaming platform link directly into the Video Link Embed field (e.g., https://www.youtube.com/watch?v=...).
- Homepage Feature: Look for the checkbox labeled "This video should appear on the main page?". Check this box only if you want this specific video to be highlighted in the main hero section of your website home-page. Important: Ensure only one video profile has this box checked at any given time.
- Taxonomies (Categories & Topics): You can filter your video files using the options on the right rail or via the left-hand submenu:
    - Select or add relevant Video types (e.g., Interview, Story, Event).
    - Assign or check the target Languages spoken in the video.
    - Assign a Video Topic (e.g., International Recruitment, Danish Cooperation).

Once all fields are complete, scroll to the top-right Publish (or Update) box and click the blue button.

04 Advisor

To manage the profile cards displayed on the public Advisors page, navigate to the advisors option in the left-hand sidebar menu. From this screen, you can click All advisors to update an existing profile or click Add New advisor to create a new professional card.

Important Guidelines for Creating or Updating an Advisor Profile:

- Basic Identity: Enter the advisor's full name into the main title field at the top of the screen. You can leave the primary paragraph text block empty, as the advisor's profile layout is entirely built from the specialized data fields below.
- Language Translations (Role & Specialties): The main Role and Specialties fields near the top of the form should be completed in English (e.g., Communications Manager and Digital Strategy).
- Scroll further down the card form to find fields labeled role_dk / specialties_dk (for Danish) and role_de / specialties_de (for German) to provide the corresponding regional translations.
- Contact & Background Details: * Fill in the advisor's specific professional background metrics under the Experience field (e.g., 5 years).
- Input their active, direct communication routes under the Email and Phone Number fields.
- Define their official physical deployment base in the Location field (e.g., Tønder, Denmark).
- Language Proficiencies: Under the Languages section, check the respective boxes (English, Danish, German) for each language the advisor is capable of consulting in.
- Profile Image Layout: To set the advisor's portrait photo, navigate to the Featured Image module on the right-hand panel of the page. Click Set featured image to upload a high-quality square portrait or select one from the Media Library.

Once all fields are complete, scroll to the top-right Publish (or Update) box and click the blue button to send the advisor card live to the frontend interface.

05 Company data base

To manage the profile cards displayed within the public Network directory, navigate to the database card option in the left-hand sidebar menu. From here, click All database card to update an existing profile or click Add New database card to generate a brand new company profile.

When users browse the live website, they will see these cards as a high-level overview. Clicking into any card opens a dedicated detail page displaying the company's full background and contact metadata.

Important Guidelines for Creating or Updating a Network Profile:

- Company Identity: Input the official name of the company or organization into the main title field at the top of the screen (e.g., Dansk Industri). The primary content block beneath it should be left empty, as the page components build dynamically from the specialized data fields below.
- Basic Company Infrastructure:
    - Location: Define the physical deployment base of the company headquarters (e.g., København V, Denmark).
    - Logo: Attach the company's brand mark by uploading a clean image file. This logo will serve as the primary visual indicator on the network directory grid.
- Language Translations (About Section):
    - The main about description field near the top of the dataset should be completed entirely in English.
    - As you scroll further down the form layout, use the dedicated about dk field to provide the Danish context, and the about de field to write out the corresponding translation for German site visitors.
- Corporate Communication Channels:
    - Email: Provide the public or direct inbound inquiries address (e.g., di@di.dk).
    - Website: Paste the link leading out to the entity's primary business website.
    - Phone Number: Add the direct telephone line including correct international area routing codes (e.g., +45 33 77 33 77).
- Industry Classifications (Company Type): Look to the categorization listings panel to select the respective checkboxes that classify this organization. You can select parameters like Company, Consultancy, Energy, Finance, or Institution so the frontend search engine can filter and group the profile cards accurately.

Once you have populated all fields, scroll to the top-right configuration block and click the blue Publish (or Update) button to dynamically display the profile inside the live Network catalog.

06 Events

To manage the timeline of activities displayed on the public Events page—where you can showcase events your organization is hosting, organizing, or attending—navigate to the events option in the left-hand sidebar menu. From here, click All events to edit an existing entry or click Add New event to publish a fresh one.

The live platform automatically tracks the calendar dates you input, keeping active and upcoming events prominently displayed for your visitors.

Important Guidelines for Creating or Updating an Event:

- Event Title: Enter a clear, engaging name for the event into the main title field at the top of the screen (e.g., Cross-Border Networking Summit 2026). You can leave the main paragraph text editor empty, as the event display maps dynamically from the structured data fields below.
- Basic Event Context & Fields:
    - Date: Select or type the exact date the event takes place.
    - Event Type: Input or choose the classification category for this entry (e.g., Matchmaking, Webinar, Conference, or Networking Session).
- Language Translations (Descriptions & Regional Titles):
  Because your platform serves an international audience, you must fill out the text containers for all three target languages to ensure a seamless experience when users switch site flags:
    - English Layout: Write a concise summary or overview of the event's goals and agenda in the primary Event Description field (maximum 150 characters for clean homepage rendering).
    - Danish Layout: Scroll down to locate the translation blocks to provide the translated description text and local event title for your Danish visitors.
    - German Layout: Use the corresponding translation fields to provide the translated description text and event title layout for your German visitors.
- Setting the Promotional Visuals: Locate the Featured Image module on the right-hand layout panel. Click Set featured image to upload an event banner, graphic, or logo from your computer, or pick an existing asset from your WordPress Media Library.

Once all language variations and date constraints are filled out, scroll to the top-right configuration box and click the blue Publish (or Update) button to send the event live to the website.

07 Blog

To publish news, industry insights, and updates displayed on the public Blog page, navigate to the Posts option in the left-hand sidebar menu. From here, click All Posts to edit an existing article or click Add New blogpost to create a fresh post.

When a user browses the live Blog page, the platform dynamically displays the latest three posts in the Recent Blog Posts track on the homepage. Clicking any card takes the reader to the full article page.

Important Guidelines for Creating or Updating a Blog Post:

- Post Title: Enter the main headline of your article into the top field (e.g., Road freight regulations on the E45 corridor, 2026 update). You can leave the primary paragraph text block directly underneath it empty, as the layout segments itself entirely using the translation blocks below.
- Metadata Configurations:
    - Category: Input the sector label or type constraints for your post (e.g., Logistics, Taxation, Talent Attraction).
    - Date: Select or type the date of publication (e.g., January 3, 2026).
    - Read time: Enter a single number representing estimated user interaction length in minutes (e.g., 5).
- Language Translations & Content (English, Danish, German):
  Because your website serves an international audience, you must fill out the text containers for all three target languages to prevent empty screens when users switch flags:
    - English Layout: Fill in the Subtitle and Content fields using English. The main Content editor allows you to type out full paragraphs and format your subheadings.
    - Danish Layout: Scroll down to find Subtitle DK and Content DK to provide the translated summary text and full article body for Danish readers.
    - German Layout: Use the Subtitle DE and Content DE fields to provide the corresponding summary text and full article body translations for German visitors.
- Setting the Cover Image: Locate the Image field block within the Custom Fields view (or use the Featured Image module on the right-hand layout rail) to attach your post's main visual graphic. Click to upload an asset or pick one from your media library.

Once all language tracks are complete and your image is loaded, scroll to the top-right box and click the blue Publish (or Update) button to send the article live across the website.

08 Resources

To add or manage downloadable files (such as PDF guides, strategy frameworks, and public documents) on the public Resources page, navigate to the Resources option in the left-hand sidebar menu. From here, click All Resources to update an existing document profile or click Add New Resource to make a new file available for public download.

When a user visits the live Resources page, they will see these items listed with their title and a summary description. Clicking on a resource allows them to immediately download the attached file.

Important Guidelines for Creating or Updating a Resource:

- Resource Title: Enter the official name of the document or file into the main title field at the top of the screen (e.g., DE-DK Business Strategy 2026–2027). The primary paragraph text editor directly beneath it should be left empty, as the resource page layout maps directly from the custom fields below.
- Uploading the File:
    - Locate the File field under the Resource Fields section.
    - Click the upload button to choose a file from your computer (typically a .pdf, .docx, or .zip) or select a document that has already been uploaded to your WordPress Media Library.
- Language Translations (Descriptions & Regional Titles):
  Because your platform serves an international audience, you must fill out the text containers for all three target languages so the downloads remain clear when users switch language flags:
    - English Layout: Write a brief, professional summary of what the file contains in the primary Description field (e.g., Strategic framework for businesses operating between Denmark and Germany.).
    - Danish Layout: Scroll down to fill in the Description DK and Title DK fields to provide the translated summary text and document title for Danish site visitors.
    - German Layout: Use the Description DE and Title DE fields to provide the corresponding translated summary text and document title for German site visitors.

Once the file is attached and your multilingual titles and descriptions are saved, scroll to the top-right box and click the blue Publish (or Update) button to make the file publicly available for download on the website.

09 Photogallery

To manage the photo collections and recaps displayed on the public Photo Gallery page, navigate to the Gallery Events option in the left-hand sidebar menu. From here, click All Gallery Events to update an existing gallery or click Add New Gallery Event to publish a new photo recap.

When a user browses the live Photo Gallery page, they will see a summary card with a cover image. Clicking into the card allows them to read a short description and view the full uploaded image gallery from that specific event.

Important Guidelines for Creating or Updating a Gallery Event:

- Event Title: Enter the official name of the event into the main title field at the top of the screen (e.g., Cross-Border Gathering Esbjerg). You can leave the main paragraph text editor empty, as the gallery page layout builds dynamically using the custom fields below.
- Basic Event Context:
    - Date: Type in the date the event took place (e.g., October 1, 2025).
    - Coverimg (Cover Image): Attach the main graphic or thumbnail image that will represent this gallery block on the photo directory grid page.
- Language Translations (Descriptions & Regional Titles):
    - Description: Write a brief summary paragraph outlining what happened at the event in English.
    - Description DK & Title DK: Scroll down to find these fields to provide the translated summary text and event title for Danish visitors.
    - Description DE & Title DE: Use these fields to provide the corresponding summary text and event title translations for German visitors.
- Uploading the Image Album (Image 1 to Image 5):
    - You can select and assign multiple event photos using the image1, image2, image3, image4, and image5 slots.
    - Click Add Image on an empty slot to either drag-and-drop a new photograph from your computer or choose an asset already uploaded to your WordPress Media Library.

Once you have loaded your text translations and images, scroll to the top-right configuration area and click the blue Publish (or Update) button to send the photo album live to the website.

10 Become a Member

To manage the contact and specialist profile blocks displayed on the right-hand panel of the Become a Member page, navigate to the Guidance cards option in the left-hand sidebar menu. From here, click All Guidance cards to edit an existing profile or click Add new guidance card to create a fresh one.

These cards connect potential members directly with specific experts who can guide them through cross-border expansion, relocation, or recruitment processes.

Important Guidelines for Creating or Updating a Guidance Card:

- Internal Title: Enter the name of the specialist into the main title field at the top of the screen (e.g., Dustin). You can leave the main paragraph text editor empty, as the layout renders entirely from the dedicated fields below.
- Core Contact Details (Guidance Fields):
    - Guidance Title: Enter the professional designation or area of expertise in English (e.g., Cross-Border Specialist).
    - Guidance Email: Input the specialist's direct email address for inbound member inquiries (e.g., dustin@businessdedk.dk).
    - Guidance Phone: Provide the direct phone line digits without spaces (e.g., 4521775917).
    - Guidance Image: Click to attach a professional photo for the card body, or use the Featured Image box on the right rail to set the profile picture layout.
- Language Translations (Titles & Descriptions):
  Because your network spans multiple countries, you must fill out the translation fields further down the form to ensure a smooth multilingual experience when site visitors toggle flags:
    - English Layout: Write a brief, inviting summary of what this specialist focuses on in the primary Guidance Description box (e.g., Dustin focuses on relocation, recruitment, and business expansion across the Danish-German border...).
    - Danish Layout: Use the Guidance title (Danish) and Guidance description (Danish) fields to provide the translated title (e.g., Grænseoverskridende specialist) and profile summary for Danish visitors.
    - German Layout: Use the Guidance title (German) and Guidance description (German) fields to input the translated title (e.g., Grenzüberschreitender Spezialist) and profile text for German visitors.

Once the contact data and all language translations are populated, scroll to the top-right box and click the blue Publish (or Update) button to push the guidance card live on the membership page.

11 About

The About page content is dynamically generated through two distinct components: Offers and Pillars.

To manage the service or feature cards displayed on the About page, navigate to the ´offers/pillars` option in the left-hand sidebar menu. From here, click on an existing entry to edit it or click ´Add New ´ to create a new one.

Important Guidelines for Creating or Updating an offer:

- Internal Title: Enter the name of the offer/pillar into the main title field at the top of the screen (e.g., Resources and Insights).
- Internal Content: Enter the description of the offer/pillar into the main content field.

- Core Offer Details (Offer Fields):

    - Card Icon: Use the dropdown menu in the offer details box to select the visual representation that will accompany the offer on the frontend (e.g., *Resources & Toolbox*).

- Language Translations (Titles & Descriptions):
  Because your network spans multiple countries, you must fill out the translation fields further down the form to ensure a smooth multilingual experience when site visitors toggle flags:

    - English Layout: Write a brief, inviting summary of what this specialist focuses on in the primary Guidance Description box (e.g., Dustin focuses on relocation, recruitment, and business expansion across the Danish-German border...).

    - Danish Layout: Use the Guidance title (Danish) and Guidance description (Danish) fields to provide the translated title (e.g., Grænseoverskridende specialist) and profile summary for Danish visitors.

    - German Layout: Use the Guidance title (German) and Guidance description (German) fields to input the translated title (e.g., Grenzüberschreitender Spezialist) and profile text for German visitors.

Once the contact data and all language translations are populated, scroll to the top-right box and click the blue Publish (or Update) button to push the guidance card live on the membership page.
